automotiveaward
most innovative use of plastics 2022

Dear Sir or Madam,

we invite you to discover innovative developments of plastic parts or components for the vehicle construction from your company or from your customers or suppliers for the 2022 **Automotive Award parts & components**. The categories in which the awards are granted, are as following:

Body Interior
Body Exterior
Power Train
New Mobility

Chassis Unit/Structural Component
Electronical/Optical Part
Enabler Technology

Three Special Awards will also be presented. The **Grand Award** goes to the parts & components with the highest overall score, the **Grand Innovation Award** is given to the part that is most often classified as highly innovative by jurors. Since 2021 we grant the **Sustainability Award**, which recognizes an improved ecological sustainability of a part or component.

You will find detailed information on how to submit your parts & components at www.automotiveaward.de. The submission fee remains unchanged, for the first part 950 euros and for each additional 800 euros. **Deadline** for entries is the **22nd of April 2022**.

In summer 2022 all submitted parts will be evaluated. The jury represents all areas of plastics technology and vehicle construction and will evaluate each part according to a defined criteria catalogue. Representatives of all submitted parts & components will be invited to the jury meeting in order to present and introduce the key features of their submissions.

The awards will be presented on **17th of October 2022** at the **Crowne Plaza Hotel Neuss**. The program for the Award Night will allow you plenty of time to network with key decision-makers from the automotive industry and system suppliers. Please register for the Award Night until 26th of August 2022 with the attached form.

We are looking forward to an exciting competition and thank you already today for your participation!

With kind regards

Dr. Klaus-Dieter Johnke
